

SMART MENU

Digital Restaurant Menu and Ordering System

Presented by: Anjan R, Harsha VP, Jisha S

Nehru Institute of Engineering and Technology

Date

Introduction

Smart Menu is a digital restaurant menu system.

Customers can access the menu through a web application.

Users can browse food items and view detailed information.

Customers can place orders directly through the system.

It reduces dependency on traditional paper menus.

Browse. Select. Order.

A seamless digital experience that replaces paper menus with an interactive ordering system.

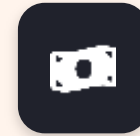

THE CHALLENGE

Problem Statement

Problems with Traditional Restaurant Menus

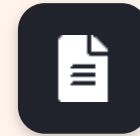

Paper menus are difficult to update.

Printing and maintenance costs are high.

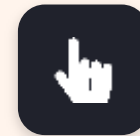

Customers may have to wait for staff to take orders.

Menu information may be limited.

Manual ordering can lead to errors.

Customers have limited interaction with the menu.

Proposed Solution

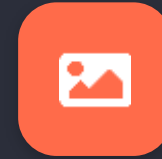

Smart Menu provides:

Digital and interactive food menu.

Food categories for easy navigation.

Images, descriptions, prices, and ingredients.

Digital cart and order placement.

Efficient order management for restaurants.

Easy updating of menu items and availability.

Objectives

01

Simplify the food ordering process.

02

Improve customer experience.

03

Reduce waiting time.

04

Minimize manual order-taking errors.

05

Provide an easy-to-update digital menu.

06

Help restaurants manage orders efficiently.

WHAT IT OFFERS

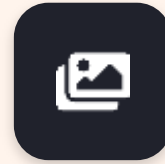

Key Features

Interactive Digital Menu

Search and Food Categories

Food Images and Details

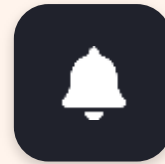

**Food Description and
Ingredients**

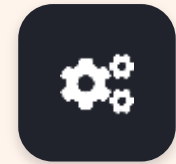

Shopping Cart

Digital Order Placement

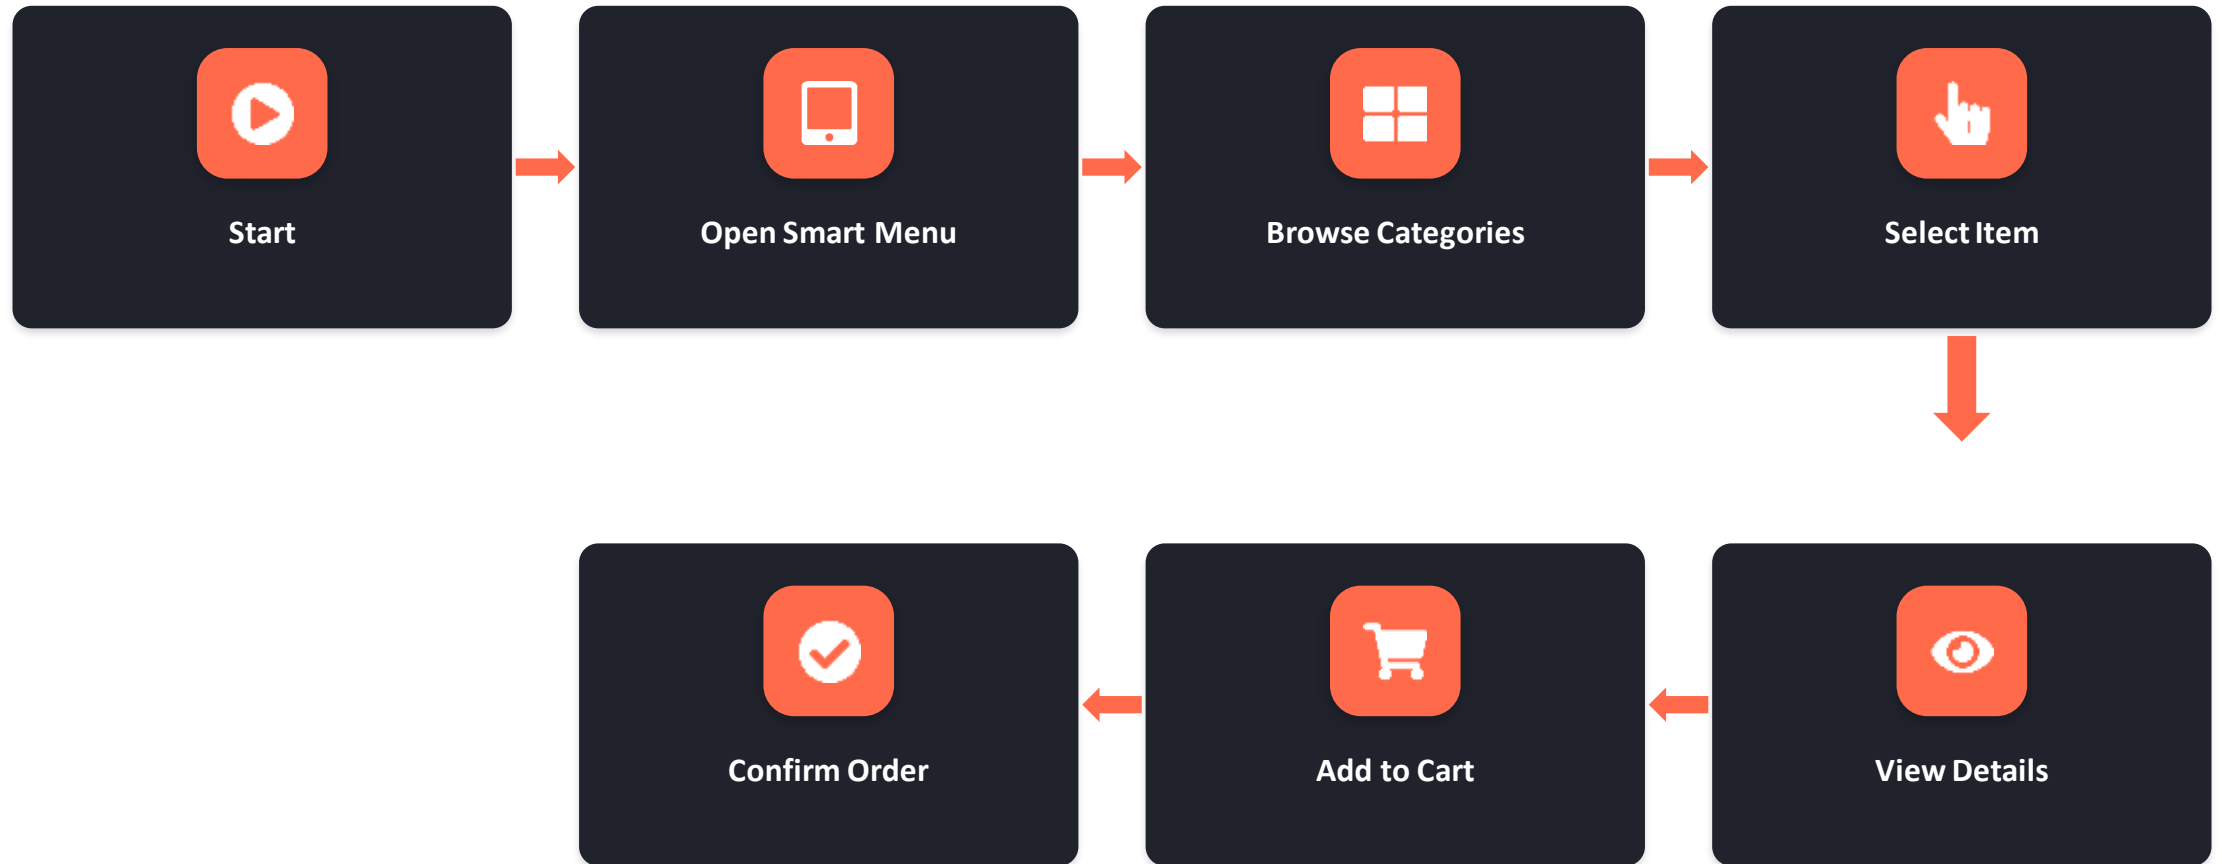

Order Status Updates

Menu Management

System Workflow

Technologies Used

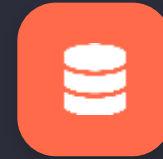

Frontend

- HTML
- CSS
- JavaScript

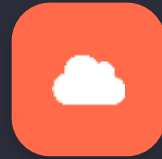

Backend

- Python Flask / Node.js

Database

- MySQL / MongoDB / SQLite

Other Technologies

- REST API

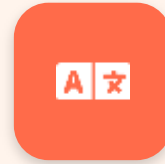

Future Enhancements

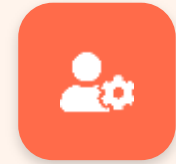

AI-based food recommendations

Voice-based ordering

Multi-language menu

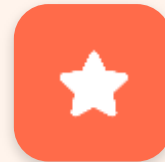

**Personalized food
recommendations**

AI chatbot for food queries

Online table reservation

Customer feedback and ratings

Real-time kitchen tracking

Conclusion

Smart Menu transforms the traditional restaurant ordering process into a faster and more convenient digital experience.

It enables customers to browse, select, and order food seamlessly, while helping restaurants manage menus and orders efficiently.
